Boiler Plate

Fusion Laboratories, Inc. offers a full-range of IT Outsourcing and Enterprise Application Services that include Managed Services, Application Commercialization/Re-licensing, and Project Management. We provide stable, flexible and secure IT infrastructure. Our mission: empower business by leveraging technology.

Key Differentiators

Flexibility – Delivering truly effective client solutions requires a flexible client-driven approach. In addition to offering the balance of Fusion Labs competencies as a menu of services, we offer creative operational, pricing, and implementation alternatives.

World Class Data Center – Fusion Labs provides leading-edge services to client's requiring stable, flexible and secure application environments. Staffed 24X7, the Data Center features hospital-grade Uninterruptible Power Supply (UPS) and two power grids. Designed and developed by SBC Communications, over one-third of the USA's Internet traffic is routed through the Fusion Labs building.

Strong Talent Base – To guarantee the executive and strategic understanding of our clients business, Fusion Labs has hired PMI-certified Project Managers, experienced consultants and former CIO's from large Corporations like Pizza Hut, RadioShack (Tandy), Marketing Specialist Group and others. Fusion Labs' impressive industry pedigree and vision translates into value for the company and its customers.
