

FUSION LABS

Application Lab Overview

In today's business climate, companies are looking for maximum operating efficiencies. They are looking for the freedom to focus on their core competencies and move their attention away from complex operational demands. Fusion Labs helps with this effort by providing the physical space, support services and connectivity requirements to cost effectively house and maintain the IT infrastructure necessary for today's businesses.

Staffed by a highly experienced team of networking professionals who provide total end-to-end application support, the Application Lab provides unprecedented managed hosting and business resumption services. These services scale to suit changing needs, safeguard mission critical data, assure security and optimize performance.

INFRASTRUCTURE DESCRIPTION

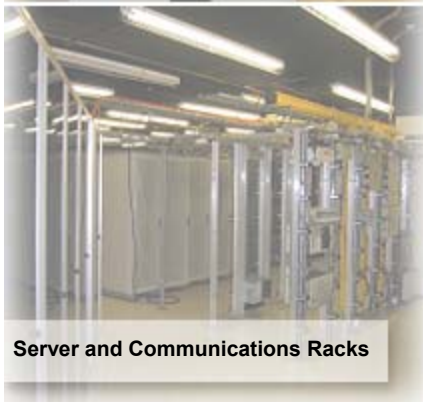

Located within the Univision Building, in downtown Dallas, the Fusion Labs Application Lab provides access to one of the Nation's Top Five network connectivity points.

Approximately one-third of the USA's Internet traffic is routed through this Tier One "Carrier Hotel" and over fifty Telecom Tenants (including WCOM, Aspen, XO Communications, Qwest, Global Crossing, SBC, etc.) utilize this facility's unique footprint to provide reliable communication service to their clients.

The Application Lab features a hospital-grade Uninterruptible Power Supply, several 350kVa diesel generators, multiple fiber-based Internet connection points, redundant microwave SONET, and is served by two power grids.
